The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach placing and wiring an integrated circuit design, generating a slack graph of critical paths in the integrated circuit design, identifying bottlenecks in the critical paths wherein identifying bottlenecks comprises determining which nets in the slack graph include more critical paths when compared to other nets in the slack graph in a combination of assigning a higher priority to reducing path edge delays at the bottlenecks than to other path edge delays or calculating a forward node weight for each corresponding node wherein the forward node weight is equal to a minimum forward edge weight of all incoming edges to the corresponding node.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
